The MAILING DATE of this communication appears on the cover she t with the correspondence address Period for Reply A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (9) MONTHS from the mailing date of this communication. - If the period for reply specified above, the maximum statutory period will apply andiviell expire SIX (9) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statutory period will apply andiviell expire SIX (9) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statutory period will apply andiviell expire SIX (9) MONTHS from the mailing date of this communication, even if timely filed, may reduce any seamed patent term adjustment. See 37 CFR 1.704(b). Status 1) ■ Responsive to communication(s) filed on 97 March 2002. 2a) ■ This action is FINAL. 2b) ■ This action is non-final. 3) ■ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) ■ Claim(s) 1-13 is/are pending in the application. 4a) Of the above claim(s) 1-7 is/are withdrawn from consideration. 5) ■ Claim(s) is/are allowed. 6) ■ Claim(s) is/are rejected. 7) ■ Claim(s) is/are rejected. 7) ■ Claim(s) is/are rejected to extension and/or election requirement. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). 11) ■ The proposed drawing correction filed on is/are: a) accepted or b) objected to by the Examiner. If approved, corrected drawings are required in reply to this Office action.	Office Action Summary	Examiner	Art Unit				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filled after SIX (6) MONTHS from the mailing date of this communication. If the pend for reply is pecified above is best than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. If INO pendo for reply is specified above is best than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. If INO pendo for reply is specified above is best than thirty (30) days, a reply within the mailing date (11) of this communication. If all the pend of the reply within the set or extended pend for reply will, by statute, cause the application to become ABANDONED (35 U.S. C. § 133). Any reply received by the Office later than these months after the mailing date of this communication, even if timely filled, may reduce any earned patent lem adjustment. See 37 CFR 1.704(b). Status 1) Responsive to communication(s) filled on 07 March 2002. 2a) This action is FINAL. 2b) This action is non-final. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) Claim(s) 1-13 is/are pending in the application. 4a) Of the above claim(s) 1-7 is/are withdrawn from consideration. 5) Claim(s) is/are allowed. 6) Claim(s) is/are allowed. 6) Claim(s) is/are allowed. 8) Claim(s) are subject to restriction and/or election requirement. Application Papers 9) The specification is objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). 11) The proposed drawing correction filled on is approved by disapproved by the Examiner.							
THE MAILING DATE OF THIS COMMUNICATION. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after 5X/ (6) MONTHS from the malling date of this communication. If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. If the period for reply specified above is less than thirty (30) days, a reply within the statutory period will apply and/will expire SIX (6) MONTHS from the mailing date of this communication. If NO period for reply six pecified above is less than the more reply within the satutory period will apply and/will expire SIX (6) MONTHS from the mailing date of this communication. If NO period for reply six pecified above is less than the more reply within the sature of the period for reply will, be sature or a valence period for reply will, be sature or a valence period for reply will, be sature or a valence period for reply will, be sature or a valence period for reply will be considered timely filed of this communication. Any reply received by the Office later than the emorths after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status 1) Responsive to communication(s) filed on OT March 2002. 2a) This action is FINAL. 2b) This action is non-final. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) Claim(s) 1-13 is/are pending in the application. 4a) Of the above claim(s) 1-7 is/are withdrawn from consideration. 5) Claim(s) 2-13 is/are allowed. 6) Claim(s) 3-13 is/are allowed. 6) Claim(s) 3-13 is/are objected to by the Examiner. 10 The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner. DETAILED ACTION

Response to Amendment

Rejections Withdrawn

1. The 35 U.S.C. 112,2nd paragraph rejections in Paper # 7 (mailed 03/07/02) have been withdrawn due to Applicant's amendment in Paper # 8 (filed 08/13/02).

Rejections Repeated

2. The 35 U.S.C. 102(e) rejection of claims 8, 10, 12-13 as being anticipated by Gibbons et al. ('405) has been repeated for the same reasons previously of record in Paper # 7 (mailed 03/07/02).

New Rejections

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 9, 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gibbons et al. (US 5,731,405) in view of Gibbons et al. (US 6,307,609).

Gibbons et al. ('405) has optical alignment layers exposed to polarized light to induce alignment of liquid crystals (column 15, lines 55-68) whereby the two-step process comprises exposing the alignment layer to a first direction of linear polarization of the incident light, and

Application/Control Number: 09/496,656

Art Unit: 1772

then exposing the layer to polarized light of a second direction of linear polarization of the incident light, at an oblique incidence (column 17, lines 1-15). The energy density may be changed at the second step, and the most preferred exposure energy ranges from 0.001 to 5 J/cm² (column 16, lines 25-60). Gibbons et al. teaches two transparent glass substrates with optical alignment films (column 20, lines 25-68) which are exposed to the polarized UV light and then filled with the liquid crystal inbetween (column 21, lines 1-10). Figure 3 shows that each substrate is aligned parallel to a reference plane and the embodiment shows the angle of incident light being at 90 degrees (right angles) to the reference plane. An ultraviolet non-electrode discharge-type lamp is taught as a light source (column 24, lines 30-40).

Gibbons et al. ('405), however, fails to teach that the substrates are specifically rotated to the claimed specific angles before the second exposure of UV radiation, and the relative ratio of exposing energies between the first and second exposures.

Gibbons et al. ('609) teaches a liquid crystal display (column 1, lines 15-45) with substrates containing a UV-reactive (photosensitive) alignment layers, wherein the substrates are first exposed to first polarized light. The substrates are then rotated 90 degrees about the normal to the plane of reference (of the substrates) with a mechanical stage. The substrates are then exposed to a second polarized light. The relative ratio of exposing energies is 4:1 between the first and second exposures. The pair of substrates are then assembled into a cell which is filled with liquid crystal to form a liquid crystal layer (column 11, lines 55-68 and column 12, lines 1-40). Gibbons et al. teaches that the angle is greater than 0 degrees but less than 360 degrees of relative rotation about the reference plane (normal to surface of the optical alignment layer) between the two exposures (column 10, lines 10-20). Gibbons et al. ('609) thus teaches that

Application/Control Number: 09/496,656

Art Unit: 1772

rotating the substrates about the reference plane between exposures to polarized light is well known in the art at the time the invention was made.

Because Gibbons et al. ('609) teaches that it is well known in the art to rotate the substrates about the reference plane between exposures, it would have been obvious to one of ordinary skill in the art to have rotated the substrates in lieu of changing the direction of the polarized light beam (incident) in the invention of Gibbons et al. ('405) in order to obtain a liquid crystal display with the desired liquid crystal alignment properties produced via an alternate method.

Response to Arguments

- 5. Applicant's arguments filed 03/07/02 have been fully considered but they are not persuasive.
- 6. Applicant argues that Gibbons et al. ('405) fails to disclose rotating a substrate on a reference plane, and therefore does not anticipate the product.

Applicant is respectfully reminded that even though product by process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process. *In re Thorpe, 227 USPQ 964, 966 (Fed. Cir. 1985)*. In the instant case, in the absence of comparative data, the examiner has taken the position that rotating the substrate instead of rotating the radiation source

Application/Control Number: 09/496,656

Art Unit: 1772

produces the same results since the coordinates of the substrate relative to the coordinates of the

radiation source remain the same in each case.

7. Applicant argues that Gibbons et al. ('405) does not have a liquid crystal layer with a

stable pretilt angle due to the lack of rotating the substrates between radiation exposures.

Applicant is respectfully requested to demonstrate the statement with a showing of fact using

clear relevant comparative data.

Any inquiry concerning this communication should be directed to Sow-Fun Hon whose

telephone number is (703)308-3265. The examiner can normally be reached Monday to Friday

from 9:00 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Harold Pyon, can be reached on (703)308-4251. The fax phone number for the

organization where this application or proceeding is assigned is (703)872-9310.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is (703)308-0661.
